WORK EXPERIENCE

Business Process Coordinator

Thin Film Technology

July 2022 - Present

Mankato, MN

- Created SQL queries that allowed for efficient gathering of data from 6 tables at once
- Built an ETL data model within Power BI and Azure Data Studio that combined multiple sources from the company ERP tool
- Designed a dashboard within Power BI that provided real-time visualizations of sales and shipping data

Trade Corrections Coach/Data Analyst

Ameriprise Financial

September 2019 – July 2022

Minneapolis, MN

- Validated data models to facilitate creation of processing reports generated by new digital tool
- Performed multiple ad-hoc data pulls using SQL to assist management with processing volume and workload questions
- Promoted the use of data in helping the team develop on-team process and tool improvement ideas
- Researched multiple data sources to find business use cases for data points when working with technology partners

Clearing Service Consultant/Trade Corrections Expert

Ameriprise Financial

November 2015 – Sept. 2019

Minneapolis, MN

- Leveraged SQL experience to create reports used for on-team processing
- Gathered business requirements and acted as point of contact for multiple technology development intakes
- Identified and prepared data used by management in analyzing correction processing overhaul
- Created two Microsoft Access databases to perform ad-hoc analysis of processing data
- Acted as a coach and subject matter expert for processing questions
- Collaborated with internal business partners on developing enhanced problem solving techniques to increase processing efficiency

SKILLS

- Knowledgeable in Microsoft Excel and Azure, as well as data virtualization programs like Denodo
- Proficient in SQL, R, and the Python programming language
- Skilled in using visualization programs like Power BI and Tableau
- Experienced in Lean operational management and problem solving techniques
